CITY IMPROVEMENT BONDS VALIDATED

COMING TO AVOID THE COLD WINTER NORTH

Sample of Letter Received Almost Every Day by Tribune Editor.

The following is an extract of a letter received from Rochester, N. Y.: "I am paying up my subscription for a few months past the date of expiration this summer, and by that date expect to join the people of St. Cloud and avoid the cold frosts of our northern winters here in New York. It may be that after we get there we will like the place so well that we will never leave to live in the north again. The heat was something terrible here this summer. It has been so hot this summer that during a period of three weeks our newspaper reported 3,000 deaths from heat. I guess Florida climate is not so hot, and won't be so cold, from what I have read about the climate of the state."

To persons who have suffered from cold winters Florida offers the only resort state in the Union. The past summer has proven the state to be a summer resort. Temperatures the year round are more even in Florida, and that within the range of comfort to the residents, than can be found elsewhere.

Visitors to St. Cloud would do well to arrange for their cottages or rooms at once, as the people are coming on every train.

Do you want to rent those rooms or that cottage for this winter. Better advertise it in these columns. It will do the work. The editor receives letters often asking the cost of such accommodations. Your advertisement would be the answer.

BOARD HAS IMPORTANT WORK THAT SHOULD BE CONSIDERED

President Sam Brammar, of the St. Cloud Board of Trade, announces the regular meeting for next Monday is a most important one. Every business man should take time on Monday evening to attend the meeting, as in this season of the year there are many questions that need the co-operative attention of our citizens, looking to the up-building of the city.

The business of the Board of Trade is the business of every business man or property owner who is interested in the welfare of the town. Affairs of this organization demand the attention of a business man just as much as the affairs of the store. Every city and town in Florida takes on new life about this season, and the towns whose boards of trade are

OLD GLORY, STAR-SPANGLED BANNER WAVES EVERY DAY

Away down south in Dixie, on the beautiful Florida peninsula, resting peacefully and quietly between the Atlantic, the queen of oceans, and the great Gulf, is the beautiful young city of St. Cloud. Here you will find a people who are most loyal to their country and to their country's flag, Old Glory. Every home and every business house displays this beautiful emblem of Liberty of our National independence. From the East to the West, the North to the South, the Stars shine and the Stripes wave a welcome over a peace-loving people. In St. Cloud you will find the old Union soldier, the Nation's retired guardian, the preserver of our Union and National liberty—which will live long after columns of marble will have crumbled to dust.

CITY COUNCIL MET REGULAR SESSION MONDAY EVENING

Other Than Monthly Reports Only Routine Matters Considered.

The St. Cloud city council met in regular session last Monday evening at the city hall, and heard the monthly reports of all officers. No important matter other than routine business was transacted.

After some discussion it was decided that bids would be received on November 30 for the construction of waterworks and sewers as well as paving as called for under the recent bond issue. The official notice for bids appears in this issue of the Tribune.

The city engineer filed a plat of Missouri avenue prepared to show the profile for sidewalks, a resolution providing for the construction of walks along several blocks of this street having been passed by the council. Property owners along Missouri avenue called for sidewalks and the resolution providing for the work appears elsewhere in this issue.

At an adjourned session of the council held Tuesday it was decided to set apart one and one-quarter acres of the city cemetery for colored people. No burial ground in the city for colored people had ever been provided.

Salaries for the months of August and September, and current bills were ordered paid.

The matter of allowing extra help for the marshal in the evenings to round up cattle that stray in the city after dark, was referred to the mayor with power to act.

City Attorney Crawford Appeared Before Circuit Court Judge J. W. Perkins at DeLand Last Saturday --No Opposition to the Bond Issue.

The \$114,000 bond issue of the city of St. Cloud, voted by the taxpayers on September 5, for the purpose of installing a waterworks and sewerage system and paving certain streets in the business section of the city, were validated in the circuit court for the seventh district, before Judge J. W. Perkins last Saturday.

The question of validation was taken to the court soon after the election, and Saturday the case was called by Judge Perkins, city attorney W. B. Crawford representing the city in the matter. There was no opposition on the part of any property owner or taxpayer in the court, so that the question of the legality of the bonds remained to be determined on them having been voted according to law and the charter of the city. This was found to be a fact, every clause of the statutes relating to bonds, and the provisions of the city's charter having been complied with, the bonds were declared valid.

City Clerk Fred Kenney has received more than forty requests for information concerning the sale of bonds, financial institutions all over the country desiring to buy. The bonds will be offered for sale on November 28th, sealed bids being received and opened on that date. After the bonds have been sold bids will then be opened on the matter of awarding a contract for the work. The specifications for the entire lot of city improvements will be ready before the date set for receiving bids on the job, so that contractors may go over every detail of what is to be supplied in the two systems and the street paving.

Requests for specifications of the

work having been coming into the office of the city clerk for several days, and it appears that there will be quite a number of bidders for the contract, as well as for the bonds.

W. A. Ginn, engineer in charge of the work, continues to run out the lines for the work, and will have the detailed specifications ready for the bidders at an early date.

It now appears that actual work may be started on the construction of the city water plant and sewerage system and the paving before the first of the year. This will give the city a lively appearance during the season when there are thousands of tourists visiting St. Cloud. Already great preparations are being made by owners of property for making improvements in keeping with the development that will occur with the completion of the city contracts. Purchases of property are being made by new home-seekers almost every day, and the city generally is taking on a prosperous look.

The building that has occurred during the summer months has been of the substantial kind, not like a boom town, but a steady growth in beautiful business blocks and residences, that speak volumes for the future of the city.

Many persons who visited St. Cloud seven years ago, when the city was started, have returned this season to be pleasantly surprised at the growth of the town. And most of these first visitors are now regretting that they did not invest long ago. Many have bought this season and the improvements that have been mapped out will make this the busiest season in the history of St. Cloud.

NEW MANAGER FOR OSCEOLA COUNTY CITRUS EXCHANGE

Succeeds Late J. W. Prentis, With Office at Kissimmee. Visited St. Cloud.

Mr. H. C. Plano, formerly manager of the East Coast District for the Florida Citrus Exchange, has been selected as the manager of the packing house conducted by the Osceola County Citrus Exchange, and assumed his new duties the first of this month. Mr. Plano will have his office at Kissimmee, where the exchange packing house has only recently been enlarged to meet the demands of the citrus growers of the county.

Mr. Plano visited St. Cloud and Narcoossee this week, making friends among the grove owners. He states that the Exchange will probably begin packing and shipping fruit from the county by November 1. With the addition of new machinery, it is understood the packing house at Kissimmee will have a capacity of three car loads per day.

While in St. Cloud Mr. Plano gave out the information that the Florida Citrus Exchange had reduced the cost of selling and shipping fruit from 16 cents per box to 11 cents per box which amount includes two cents per box for advertising.

Prices are better this year for fruit than for some years previous, and while the crop is not as large, the growers of Osceola county will likely ship more than 40,000 boxes through the Exchange.

COURTEOUS GREETING MEANS MUCH TO NEW ARRIVAL

Complaint Sent Tribune That Solicitors Annoy New Arrivals Demand Attention of City Officials.

It is a well known fact that the courteous treatment of visitors arriving for the first time in St. Cloud, makes an impression that is lasting. The city has gained a reputation far and wide for the hospitality of its people. This reputation should be carefully guarded, and we print the following complaint with the hope that this matter will be given closer attention in the future to prevent a recurrence.

To Editor St. Cloud Tribune—

The tourist season is now upon us and many are now arriving, some as guests and some old residents who are returning. One day last week I witnessed a scene at the depot on the arrival of the evening train which I consider far from being a credit to the Wonder City. A veteran carrying two grips alighted from the train and two of our many hotel touts accosted him, each one seizing a grip and subsequently each an arm, each one trying to induce him to go to their respective hotels. I should like to inquire if there is any law in the city to prevent such actions and if so why it is not enforced. Elsewhere such actions would be considered a nuisance and the participants should be brought before the mayor and fined regardless of who they are. If the mayor and council, with the assistance of the town marshal cannot stop this the citizens should take the matter in hand and do it themselves.

Viator.

"PAINT THE TOWN" SEASON HAS APPEARED WITH COOL DAYS

Many Houses That Need Beautifying With Colors Should Be Given Attention Before the Rush of Visitors to the Wonder City.

What is the matter with starting a little "paint up" campaign for St. Cloud? Certainly it would do no harm to make the clean-up general at this season, when the cool days have arrived and paint can be applied to the best advantage. Then all possible effort should be put forth to make every home and business house attractive before the great throng of winter visitors arrives. There are over one hundred houses that a representative of the Tribune spotted out this week that needed attention from the paint brush, and this observation was made on a casual visit to certain sections of the city that will soon be occupied by visitors from the North. These houses will add much to the beauty of the city if they are given attention once.

St. Cloud has gained a reputation for the neatness of its homes, but there are always some people who become careless of the properties that are owned for rental. Many of the houses that we observed are owned by persons who have been away all summer, and more than likely are unaware of the condition of the houses. We trust this little reminder will cause them to look into the matter and have the remedy applied at once.

Residents have little idea of the impression of unpainted or neglected buildings on the minds of strangers. A few days ago a stranger interviewed a real estate agent for the purpose of renting a house. He was taken out

to see several. As they approached the first home to be shown the stranger remarked that he wouldn't live in that building if the rent was free. He said "the inside may be in first class condition and well arranged, but I could never accustom myself to living in what appears from the outside to be a hen coop. As for my wife, she would prefer to be in a tent."

Roughly estimated it requires about eight gallons of paint for the average dwelling. The expense of the material is very slight and as a protection against the elements is worth twice what it costs to apply. Non-resident property owners are hereby requested to assist in this work by instructing their agent to have the work done. The cost will be offset by making the building, if now occupied, more desirable and therefore more easily rented.

TWO COMRADES ARRIVE HERE

Comrade John Reubert, late of the 91st Ill. Co. A, accompanied by his son, James, arrived in town from Chicago on the 9th inst. Both these gentlemen were here during the winter of 1909-10, and have not been here since. They have been looking over Florida with the idea of settling down and have their goods on the road. They find many improvements and are much surprised at the growth of the Wonder City. They will temporarily rent quarters and will probably invest again in the future.

ST. CLOUD BEST PLACE IN THE WORLD SAYS DR. E. G. FARRIS

Dr. E. G. Farris arrived home from Kansas Saturday, and called at the Tribune office to state that he had learned to his satisfaction that the St. Cloud section enjoyed the best climate in the world. Mr. Farris had been spending the summer months in the southern part of Kansas and said: "There is no use in talking about climate. St. Cloud has the best climate in the world. It is so far superior to that of Kansas that I expect to see quite a number of people come here from that state as soon as the election is over."

Mr. Farris made some inquiries with reference to the probability of new residents being added to St. Cloud, and all along the way home he stated he heard many people say they were

coming this winter. Quite a number are only waiting to get to vote before changing their homes.

Coming toward Florida Mr. Farris stopped off at Chattanooga, Tenn., where he visited the battlefields of Lookout Mountain, Missionary Ridge and Chickamauga Park.

Mr. Farris was pleased with the business activities in that section, but stated that their climate did not suit him for making a home.

One thing that impressed Mr. Farris while in Chattanooga was the large number of home-made products exhibit at the Chamber of Commerce in that city. He remarked while in the Tribune office, that practically every farm implement needed in this section could be bought in that city, and that such a near market should save the farmers of the South much money.

COMRADE THEODORE HAMM VISITS HIS CHILDHOOD HOME

Comrade Theodore Hamm, who has been a resident of St. Cloud since 1909, has just returned from a trip to the West, where he has been visiting his children and friends for several months.

In the course of his travels he visited the copper country on Lake Superior, and had occasion to look over the Calumet Hecla mines, whence came the large ingot of copper that is on exhibition at the National Museum in Washington, D. C. He gives a very vivid description of how the mining is carried on and brought back with him some fine specimens of both copper and silver taken from the mines in that vicinity. On his way home he stayed in Chicago and took

a notion to visit the place of his birth, Coral, Illinois, little expecting to find many of his old friends alive, as he had not been there for fifty years. The first man he met was an old comrade, who served in the same regiment, the 95th Ill. The second man he met was his old bunk mate, and thus he got on the track of his brother, whom he had not seen for thirty-two years, and who is now in the electrical business in Coral, Ill. He found the house still standing where he lived seventy-two years ago, and which he expected to find long ago demolished. Mr. Hamm found so many old friends and relatives in town that he remained there ten days instead of just staying one day. He also visited several other towns in the vicinity and discovered many more friends of his childhood.

Buy at Home-Save Freight

THE Merchants of St. Cloud are reminded that Mr. W. H. Millsom is a wholesale dealer in CIGARS, TOBACCOS, CIGARETTES, ETC.

and that all standard goods can be purchased right here at home as cheap as anywhere in the country and save the freight that must be paid when orders are sent away.

The best goods on the market at the lowest prices. No freight.

Remember that.

Then also remember that Millsom makes as good a cigar as you can get anywhere. Boost the home town by buying here. You save money when you buy here and you help home industry also.

W. H. MILLSOM

News Notes From Kissimmee

Tampa has another industry with a pay roll of some \$9,000 per month, called the Proudfoot Asphalt Paving Company, and we wish them success in their undertaking. According to the Tampa Tribune, seventy per cent of the material used in the manufacture of those asphalt blocks is obtained right in Tampa, not imported. This material consists of cement, Florida pulverized limestone dust filler, Hudson river trap rock, Knoxville, Tenn., limestone, and Tampa sand of three sizes—very coarse, medium coarse and fine coarse. The percentage of material in each block is ten per cent of special asphalt block cement, 15 per cent of dust, 50 per cent of stone of various sizes and 25 per cent of correctly graded sand, actually graded by chemical test. These figures do not bear out the statement that 75 per cent of the materials for the making of these blocks is obtained right here, meaning Tampa. The Tucker-Tex Brick Company, of Kissimmee, is now turning out a brick consisting of these ingredients, a preparation of petroleum, cement and saw-dust. The bulk of these materials, as can be readily seen, is obtained in Florida, the bulk being saw-dust. The makers of these bricks claim they are the best on earth, and judging by those already laid their assertion is being substantiated.

The Proudfoot Asphalt Paving Co. has need to throw up its head and to step lively, as although it has a slight advantage in age, the Tucker-Tex Brick Company will certainly endeavor to come in the winning horse. Well, here's good luck to both. There is an abundance of room on the track of Progress for both enterprises.

Domino Rotundo, who came to our city some ten years ago, and acquired property, building part of a business block and having the distinction of growing and selling the first celery in quantity from this section, decided

to visit a married daughter who resides in Newark, N. J. While north the sleuths of the law guessed Domino in, accusing him of a murder committed in Sunny Italy some seventeen years ago. Our fellow townsman was placed in durance vile for seventeen days, until he proved an alibi and persuading the authorities to see that a man living in America could not possibly commit murder in Italy. Domino, who left here in the spring, is again with us, with a sad experience and a pocketbook minus \$500. No one in Kissimmee can mistake his identity as his speech betrayeth him.

County court convened at 10 p. m., October 9th, Judge T. M. Murphy presiding. There were twenty-three criminal and twelve civil cases on the docket. Only one jail prisoner on trial—the rest of the accused were either out on bail or out on their own recognizance.

A mooted question is this: Providing Great Britain wins with the help of the Entente Allies, will she become arrogant after this great war struggle. When all of the countries now war would be paying her tribute, foe and friend alike. She would come out of the melee with the world's dominant navy, the best equipped army, solidly united with her colonies (willing to grant them preferential rights) and vast new African possessions with sundry islands thrown in. Is Britain's "Kultur" sufficient to enable her to sway the scepter for the good of humanity in general or for self alone. So far her people have shown up as brave men and gentlemen and we confidently believe "blood will tell."

The girls of the Kissimmee Athletic Club held a successful benefit lunch at the old Family Shoe Store, Broadway, on Friday, October 6th, from 4:30 to 10 p. m.

The world's series for the baseball championship is now being contested for between Boston and Brooklyn. The contest began on Saturday last and the games thus far played resulted as follows:
Brooklyn 5 10 4
Boston 6 8 1
Monday:
Brooklyn 1 6 2
Boston 2 7 1

Chas. Nelson and family have returned from Winter Haven. Mr. Nelson was lessee of the Pavilion at Winter Haven, which was totally destroyed by fire some two weeks ago. This building had a dance hall and bathing lockers, etc. and was partly covered by insurance.

J. D. Clark, representing the Hunter Land Co., has returned from a trip out West.

Chas. P. Dowd, cashier of the People's Bank, Orlando, was transacting business in our city on Monday last.

A party residing in West Florida bought two car loads of oranges lately and billed them to a city up North as pineapples. These cars crossed the Georgia line and were then held up by U. S. fruit inspectors, who naturally discovered the deception. Comment is unnecessary, but we would very much like for Uncle Sam to place a metal tag securely fastened round this shipper's neck on which was placed the word "Scab."

DENTAL PREPAREDNESS

What is the most important attribute of a soldier?
Good feet?
No.
Good eyesight?
No.
Good brains?
No.
What then?
Good teeth.
A soldier must have good feet, good eyesight, and good brains, but if he has bad teeth, he can't eat. If he can't eat he can't march near enough to the enemy to see him and use his brains to fight him.
How does a soldier get good teeth?
By having good teeth in childhood.
How do children keep good teeth?
Through being taught by their mother how to keep their teeth clean and having their teeth looked after while they are growing. This makes good teeth for future soldiers.
It would seem then as though the first patriotic duty of a mother was to keep her children's teeth in good condition.
It is.

Nobody Would Know It

The hostess was playing a difficult selection from Wagner, relates The Chicago News. In the midst of it she suddenly stopped in confusion. "What's the matter," asked one of the visitors.
"I—I struck a false note," faltered the performer.
"Well, what of it?" cried another guest. "Go ahead. Nobody but Wagner would ever know it, and he's dead."

\$115,000 in Improvements

This city recently voted a sum of \$115,000 for the installation of a water works system and sanitary sewers, providing also for paving streets in the business section. This will provide every modern convenience necessary to real comfort. The climate of this section is too well known to need extensive comment, and with the installation of these public improvements, work on which has been started, there can be no better place found in Florida for making a home.

Correspondence solicited. Maps and plats on file at St. Cloud, so that prompt sales may be made of any property unsold at date of inquiry.

PROFANITY OF PRINTERS

—By Mr. Dooley.
"I don't believe in profanity, Hinnissy—not a-regular thing. But it has its uses an' its place. For instance, it is issential in some thrades. No man can be a printer without swearin'. 'Tis impossible. I mind want I wint to a printin' office where a friend iv mine be th' name iv Donovan held cages, an' I heard th' foreman say:
"What gintleman is settin' A thirty?" he says.
"I am' says a pale gintleman with black whiskers an' tobacco in the rear iv th' room.
"Thin' says the foreman, 'ye blankety-blank blacksmith, get a move on ye. D'ye think this is a annoal incyclopedee?' he says.
"Ivrybody swore at ivrybody else. Th' little boys runnin' around with type prattled lanocent profanity, an' after a while th' iditor came in an' he swore more thin inibody else. But 'twas aisy to see he'd not larned th' thrade iv printer. He swore with th' ionthusiasm an' acc'uracy iv an ama-choor, tho' I must say he had his good pints. I wist I cud raymimber what it was he called th' czar of Rooshya ('r dyin' just as th' paper was goin' to press. I cud've often used-it since, but it's slipped me mind.—Printer's Engineer.

LEVY COUNTY MAN CURES PEANUTS UNDER COVER

Peanut hay is usually neglected because it is a by-product of peanut raising. Nevertheless it is a valuable by-product and it will amply repay the care necessary for good curing. One Levy County farmer, A. G. McKay, has built a barn 60 by 400 feet, which he uses in curing his peanuts. The nuts and vines are harvested and placed in the barn on a series of pole platforms. These platforms are placed about four feet from the ground to the top of the barn as the peanuts are mowed. A layer of peanuts about a foot deep is placed on each platform. When they have cured about three weeks in this open shed, the nuts are picked off, the poles are taken off and the hay is allowed to drop to the first floor. In this way Mr. McKay makes the best quality of hay possible and obtains clean nuts. The hay is worth at least \$15 a ton.—Agricultural News Service.

THIN GREY LINE TO HOLD REUNION IN TAMPA THIS MONTH

Great Preparation Made by Metropolis of South Florida to Entertain Veterans on 17th, 18th and 19th.

Tampa, Fla., Oct. 12.—Preparations are being made to entertain 500 Confederate veterans, a large number of Sons and Daughters of the Confederacy and 5,000 visitors during the annual reunion of Florida Confederate veterans in this city October 17, 18 and 19. Free lodgings will be provided for at least 300 of the veterans. Headquarters for the veterans will be at the Hillsboro hotel, those of the Sons at the Bay View, and headquarters for the Daughters at the DeSoto. These are all modern, up-to-date hotels, and in addition there are a large number of smaller hotels ready to handle guests.

Five hundred special badges have been ordered for the veterans and Sons of Veterans and a large number for the Daughters. Moving picture theatres have promised to admit all veterans free and an effort is being made to have the street car lines furnish them with free transportation about the city, using their Confederate crosses as credentials. A splendid time is guaranteed all the Veterans attending, Tampanians being wide-awake to the opportunity given them to establish their reputation as good hosts.

An interesting and highly pleasing program has been arranged for the reunion period, including business and social sessions. Many entertainment features will be added. The business sessions will be held in the handsome new City Hall. The full program is as follows:

Tuesday morning—Welcome meeting at the Tampa Bay Casino; J. A. Griffin, representing the Board of Trade; Dr. S. L. Lowry, Sons of Veterans, and Judge C. B. Parkhill, the city of Tampa. Responses by Gen. E. M. Law, of Bartow, for the Veterans, and Gen. W. W. Harris, of Ocala, for the Sons.

Tuesday afternoon—Executive session at the Tampa Bay Casino. From 3 to 5 o'clock Children of the Confederacy reception at the Woman's Club building, Tampa Bay Park, and from 4 to 5:30 o'clock reception by Daughters of Confederacy of State president and executive board, at the home of Mrs. C. E. Webb, Lafayette street.

Tuesday evening—Reception at the Tampa Bay Casino. Introduction of sponsors and concert.

Wednesday evening—Business session at 11 o'clock at the Tampa Bay Casino. Excursion on bay, memorial ceremony on the boat. Lunch by the Daughters.

Wednesday night—Ball at the Centro Asturiano. Square dances and the ladies to dance with the Veterans.

Thursday morning—Business session in the morning.

Thursday afternoon—Parade in which Veterans, Sons of Veterans, Spanish War Veterans, Tampa Fire and Drum Corps and Boy Scouts take part. Route from Tampa Bay gate, boulevard, Franklin street, Lafayette street, Florida avenue to Twenty-second street, and then Franklin street. The Veterans and their ladies will be in automobiles.

Thursday night—Grand barbecue at Plant Field Park. The tables to be built across the field. Large fires.

Sons of Veterans to meet on Wednesday and Thursday at 10 o'clock at the City Hall.

The following General Order No. 6 has been issued from the headquarters of Maj.-Gen. L. H. Buchanan at Chleyey:

"Comrades: Your commander invites your attention to the near approach of our state reunion at Tampa, Fla., October 17-19, 1916.

"It is more than likely that some very important business will come before the convention and it is my desire that each and every camp in the division be represented.

"The anticipated pleasure of meeting many of my comrades and a goodly number of the Sons and Daughters increases the activities of my life and tends to brighten my few remaining days.

"Let me urge upon you, my comrades, your sons and daughters, to meet with us, as it may be the last meeting for many of us.

"Gen. A. G. Baker, who has charge of the Veterans' interest, will not be satisfied short of a full attendance.

"The big-hearted people of Tampa want you all to come and share their generous hospitalities, they bid you all hearty welcome.

"Maj.-Gen. L. H. Buchanan, "Commanding F Division U. C. V. "Commanding Fla. Div. U. C. V. "Col. W. A. Rawls, "Adj. Gen. and Chief of Staff."

SAYS VITRIFIED BRICK IS BEST PAVING MATERIAL

Representative of Brick Manufacturer Visits St. Cloud to Learn More of Paving Proposal.

George O. White, representing the Southern Brick Manufacturers Association, of Birmingham, Ala., visited St. Cloud Friday on an educational campaign in matters relating to street and road paving. Mr. White called at the city hall to request a copy of the specifications for the paving work to be done under the recent bond issue, and to learn the names of the city officials and prominent business men of St. Cloud, stating that his company desired to send some circulars giving statistics on paving to the people of St. Cloud.

According to Mr. White, the traffic of the country today is sixty-five per cent of vehicles with rubber tires, and that the noise feature of vitrified brick will therefore be practically eliminated in the city using brick. He claims that sand-asphalt does not last as long as it should and contends that a grouted brick road, when constructed in the right manner, makes the best road for all purposes that can be obtained. He proposed to show in the educational campaign he is conducting, that the vitrified brick, while costing more to construct, lasts much longer and require less repair than any other kind of road.

The city council has called for estimates on several kinds of paving material, bids to be received when specifications are complete, and will consider every kind according to its lasting qualities, desirability and cost.

There is to be \$15,000 of the bond issue used for paving.

GETTING READY FOR THE S. C. D. C. E. CONVENTION

The Presbyterian Christian Endeavor Society held their regular monthly business meeting at the home of Mr. and Mrs. E. N. Hollenbaugh, on the evening of October 2nd. At this meeting was held the semi-annual election of officers, and an entirely new list were elected, as follows:

Mrs. Ethel Portis—President.
Mrs. E. N. Hollenbaugh—Vice President.
Miss Lillian Ide—Secretary.
Mr. Wm. Ide—Treasurer.

The leading feature of the evening was the election of the president, which was unanimous, as everyone present, whether member or not, voted in the affirmative.

A committee on entertainment for the coming District Christian Endeavor Convention was appointed. This convention is to be held in the Presbyterian church of this place on November 4 and 5. We are expecting some of the best speakers in the entire South to address the convention. Further announcement will be made later.

After adjournment various games were played, including a peanut hunt, after which delicious refreshments were served by the hostess.

Corresponding Secretary.

PLANT A PATCH OF SMALL FRUITS

Every farmer should have a patch of native blackberries and dewberries. These fruits will be appreciated as a delightful addition to the table supply of fresh fruits in spring. According to C. K. McQuarrie, state agent for the University of Florida Extension Division, it is not necessary to buy the bushes. They can be obtained from the fields and from the patches where they have not been molested. If one has marked the heaviest producers these should be transferred to the home berry patch.

Land for these fruits should be as well prepared as for any crop. The blackberries should be placed in rows four feet apart in 18 inches in the row. Dewberries should be planted 12 to 13 inches apart in 42-inch rows. The blackberries will need no trellising, but two wires should be strung for the dewberries to climb on. The first wire may be placed about 18 inches above the ground and the second the same distance above the first.

With cultivation and proper care these berries will produce fruit twice as large as they do in their wild state. They may be planted during November, December, January or early in February. It will be necessary to prune the bushes before they are planted. The dewberries should be cut back to eighteen inches and the blackberries to two feet.—Agricultural News Service.

I am out of work, sir, and—
See here, my man, I gave you fifty cents last week.
Well, sir, you've earned more since then, haven't you?—Puck.

ROOM FOR ALL EUROPE

The United States can swallow all of Europe—area, population and all. The entire combined computed area of the foreign countries and the area of the western United States are very nearly the same, says the Popular Science Monthly. The discrepancy is a bare 15,000 square miles on Europe's side. At the same time, however, Russia in Europe would spread over the whole western part of our country, crowding it to the doors with its 111,000,000 of people, being the largest of all European countries. The state of California has ample quarters for seven European countries, but its population is only a little over 2,000,000, whereas little Roumania alone harbors just about 7,000,000 inhabitants.

Austria-Hungary fits rather tightly across the shoulders in Texas, which has a scattered population of nearly 4,000,000, whereas Austria-Hungary has more than 51,000,000 of people accommodated within its boundaries.

More striking, however, is corpulent Idaho, with its 350,000 inhabitants living in an area sufficient to quarter 16,000,000 of European beings living in four large countries. Then there are Montana and North Dakota with their 600,000 people enjoying enough room for Spain and Portugal's 25,000,000.

CLEAN TREES AND BRIGHT FRUIT KEYNOTE OF CITRUS SEMINAR

Clean trees and bright fruit cannot abide with citrus diseases and pests. Two or three years ago a new disease threw growers into a panic. Certainly there was cause for alarm, but in many cases those same growers accept the old diseases and pests as a matter of course and allow them to go on draining their trees and marking their fruit. Whether the cause is indifference or inability to cope with their troubles, the results are the same. Thousands of dollars are lost annually.

Indications are that the losses will be heavier from unclean trees and marked fruit. This is not a result of more severe attacks by diseases and insects, but a result of the market's revolt. People want clean fruit and dealers who cater to them discriminate against unclean fruit. The market will take care of indifference, but enlightenment is the only cure for those who are willing and unable to produce good fruit.

As a result of the demands of the market, the Citrus Seminar at the University of Florida, October 17 to 20 inclusive, will offer a number of demonstrations and exhibits valuable to growers. A new phase of the Seminar this year will be demonstrations and exhibits of spraying machinery. K. E. Chandler, of the College of Engineering, will give lectures and demonstrations on the use of gasoline and other engines. A good man will be obtained to discuss spraying machinery from an engineering viewpoint.

Seven companies have agreed to exhibit power sprayers. Displays and demonstrations of this machinery will give the grower an opportunity to compare it in the light of his needs.

The exhibits of diseases and pests will be greater than ever and better arranged to show the damage they cause. The advantages of control measures will be contrasted with no-treatment methods.—Agricultural News Service.

WHERE TO PUT ONE'S FAITH

Let him who things he can peer even a little way into the future go out some bright night and look at the stars. There they are—thousands of them. They are, perhaps, all peopled with beings who, like ourselves, are worrying about what may happen, but even the smallest of the nebulae is not thereby deflected from its regular course, and the eternal balance of the universe shows no sign of being disturbed by what seems to us the titanic struggle in which the inhabitants of the planet Earth are now engaged.

Are we not, after all, justified in believing in and relying upon this eternal balance? Does it not explain the "agreeable disappointments" that the prophets of economic disaster have had to face ever since the dogs of war were unleashed in August, 1914? We thought there would be no men left to work in Europe by this time, and lo! the women have taken their places.

We supposed that all the world's gold would be secretly hoarded, but the reverse has happened.

Now we think that the competition of a crippled, impoverished and hungry Europe will shortly menace our opulent industry and destroy our trade.

Perhaps it will, but the experience of the last two years leads us to hope and almost believe that somehow the eternal balance will be maintained.—Theodore H. Price.

HELP MESSAGE IN BOTTLE

A message that washed ashore in a bottle started hurried preparations here to outfit a searching party to find Capt. George Duggan and the crew of the lumber schooner Emma Harvey, believed to be marooned on an island of the Chantelour group. The call for help cast up by the sea on the beach near Biloxi, read: "Help—on an unknown island—George Duggan and crew."

Relatives said it was in Capt. Duggan's handwriting.

The Emma Harvey was lost in the great storm which swept the Gulf of Mexico, a short time ago.

ST. CLOUD TRIBUNE

Published Every Thursday by St. Cloud Tribune Company.

Entered as Second-class Mail Matter, April 28, 1910, at the Postoffice at St. Cloud, Florida, under the Act of Congress of March 3, 1879.

The Tribune is published every Thursday and mailed to any part of the United States, postage free, for \$1.50 a year, 75c six months, or 50c three months—strictly in advance.

Reading notices in local column 10c a line. Rates for display advertising furnished on application.

Advertising bills are payable on the first of each month. Parties not known to us will be required to pay in advance.

Important Notice!

In sending in your subscription, always state whether renewal or new subscriber.

In renewing from another postoffice give former address.

In changing your address be sure and give former address.

SUBSCRIPTION, PAYABLE IN ADVANCE, \$1.50 A YEAR!

HOW ABOUT THE DAILIES?

A meeting of the Florida Press Association was held at Jacksonville on last Friday and Saturday, and after discussing the situation confronting the newspaper publishers of Florida, a set of resolutions were adopted calling on the editors of the weekly papers in the state to increase the subscription price to \$2 per year and the advertising rates to a minimum of 20 cents per inch for the first 1,000 circulation or less.

St. Cloud's improvement bonds have been validated in the circuit court. The bonds are being advertised for sale and on expiration of the 30 days for advertising as provided by the city charter, will go to the highest and best bidder.

Major William Warner, United States Senator from Missouri from 1905 to 1911, died recently at his home in Kansas City, Mo. He was formerly commander in chief of the Grand Army of the Republic.

E. P. Harris, known as Kansas' oldest printer, passed to the Great Beyond on September 25th, at his home in Kansas, at the age of 83 years. Mr. Harris had a record as a proof reader that has probably never been equalled.

GOVERNMENT CROP REPORT

Washington, D. C., Oct. 9.—A summary of the October Crop Report for the State of Florida and for the United States, as compiled by the Bureau of Crop Estimates, U. S. Department of Agriculture, is as follows:

- Corn Florida—October 1 forecast, 12,800,000 bushels; production last year (final estimate), 12,000,000 bushels. United States—October 1 forecast, 1,720,000,000 bushels; production last year (final estimate), 3,054,535,000. Oats Florida—Preliminary estimate, 880,000 bushels; production last year (final estimate), 1,220,000 bushels. United States—Preliminary estimate, 1,230,000,000 bushels; production last year (final estimate), 1,549,362,000 bushels.

- Tobacco Florida—October 1 forecast, 2,850,000 pounds; production last year (final estimate), 3,549,000 pounds. United States—October 1 forecast, 1,200,000,000 pounds; production last year (final estimate), 1,060,587,000 pounds. Potatoes Florida—October 1 forecast, 1,200,000,000 pounds; production last year (final estimate), 960,000 bushels. United States—October 1 forecast, 301,000,000 bushels; production last year (final estimate), 359,103,000 bushels. Sweet Potatoes Florida—October 1 forecast, 2,640,000 bushels; production last year (final estimate), 2,576,000 bushels. United States—October 1 forecast, 67,800,000 bushels; production last year (final estimate), 74,297,000 bushels.

SURPRISE PARTY

Mr. and Mrs. Harold Ricketts, of 616 Tennessee avenue, gave a pleasant family party and enjoyed an informal dinner at their home Monday night.

Mr. Ricketts was entertaining his little grandson when the folks walked in on him. He wanted to know what it all meant and they answered him that he was forty-four years old.

Mr. Ricketts declared he would like another surprise tomorrow. Of all the good things to eat there was an abundance, and we can't begin to tell about the dinner, which was prepared by Mrs. Harold Ricketts and Mrs. Geo. Ricketts and Mrs. Mary Ricketts.

Those present were: Mr. and Mrs. H. W. Rummell, Mr. and Mrs. Theodore Smith, Mr. Van Ricketts, Mr. William Wheeler, Mr. Chris Rummel, Mr. and Mrs. Harold Ricketts and little son, Oscar, Mr. and Mrs. W. A. Ricketts, Mr. and Mrs. George Ricketts.

One Who Was There. GEORGE W. DAUGHERTY

George W. Daugherty was born in Clarksville, Green county, Pa., October 14, 1834, from which place he removed to Carmichael, Green county, Pa. When the war broke out he enlisted in Company D, 22nd Penna. Volunteer Cavalry, better known as Ringold Cavalry.

Conrade Daugherty passed muster at St. Cloud October 9th, and the funeral services were conducted at the home by Rev. Northrup. The interment took place last Saturday, October 7th, in Mt. Peace Cemetery, C. E. Carlson officiating.

Card of Thanks We wish sincerely to acknowledge our appreciation of the assistance rendered and of the sympathy accorded us by our many friends during the illness and at the demise of Mr. George Daugherty.

Margaret Barager was born July 16, 1842, in Butler county, Ohio; she came to Illinois with her parents in her childhood days; was married to Henry Wilson in 1860; one child was born to them—Arthur Wilson, who now resides in Shelbyville, Ill.

The funeral services were conducted at the Barager home last Sunday afternoon, Rev. Northrup preaching the sermon. The interment was under the supervision of Undertaker C. E. Carlson, the body being laid to rest in Mt. Peace Cemetery, St. Cloud.

Card of Thanks I wish to express my heartfelt thanks to the many friends and neighbors who so kindly assisted me during the long sickness and after the death of my beloved wife. I was deeply touched by the genuine kindness and sympathy expressed.

Zachcus Barager.

Developing Photos View Work

Pictures of the baby at various periods will bring back in later years the memory of those wonderful childhood days.

Perhaps you have a real good small photograph that you wish enlarged. If so, you want a job that will do matter of posing which requires a justice to the original.

Nothing can take the place of father and mother. But a good photograph will keep a perfect image of their faces always before you.

Detail-in view work counts for more than anything else. Experience only can give results. We have the experience and will guarantee our work the equal of any photography or view work to be obtained.

SENATOR FLETCHER EXPLAINS WORKINGS OF FARM LOAN ACT

Florida Citrus Lands as Well as Other Farm Properties Subject to Loans Under Federal Bill--Farmers Given Twenty Years in Which to Repay Principal and Interest of Loans.

With reference to the operation of the Federal farm loan system, Florida fruit growers will be interested in knowing whether orange grove property will be regarded as coming within the act and furnishing desirable security under the head of farm mortgages.

Senator Fletcher said: "Undoubtedly, while the primary purpose of the act is to develop agriculture, the term 'agriculture' includes the raising of fruits, vegetables, forage crops, grains, live stock and productive activities generally of the land. I am sure the board will give a broad and liberal interpretation to the terms 'agriculture,' 'equipment,' and 'improvements' used in the act.

"How are orange groves regarded among those who have money to loan as security? What is the experience in that particular? I say these questions may have a bearing with the board in the way of precedents.

"Florida is wonderfully and particularly blessed by nature. It has a very wide range of soils which are adapted to fruits, vegetables and field crops. It can be made a great live stock state—already an important line of agricultural production. Its great advantages lie in her unqualified climate. This affords a growing season practically covering the whole twelve months. The state has abundant rainfall. Two, three, or even more crops a year of certain farm products may be grown.

"The 'earning power' of the property as a factor in the appraisal is not limited to a single year nor to any number of years. I should say an average of the 'earning power' of such properties for a period of years could reasonably be taken as a standard factor in aiming at the appraisal value thereof.

"To illustrate, suppose a Florida farmer has a bearing orange grove of ten acres, this being a part only of his 100 or 150-acre farm. He may have as improvements a residence, barns, hen houses, cattle sheds, a silo, good fences, etc. He may raise Irish potatoes for the early Northern markets, and sweet potatoes for home markets, besides field crops for use on the farm.

KING & CO. Real Estate Notary Public Veterans' Register General Inquiry Bureau Pennsylvania Avenue and Tenth Street St. Cloud, Florida

EVERYTHING IN Hardware, Paints, Oils and Varnishes H. C. Hartley Penn. Ave., bet. 10th and 11th Sts. St. Cloud, Florida My motto: "Square Deal"

would naturally enter into the appraisal value of the land. If that should be fixed by a loan committee at, for illustration, \$5,000, with the evidence thereof presented to the land bank when the application for a loan is made, the land bank appraiser would hardly reduce that valuation.

All Will Benefit "To exclude citrus growing lands from the benefits of the Federal farm loan act would be wholly inconsistent with the letter, the spirit and the purposes of the act. Not only orange and other citrus properties will be able to reap the benefit of this new mortgage credit system, but the state of Florida as a whole will be greatly enriched when the credit facilities of the Act are enjoyed by those who till her many kinds of soil and produce her many forms of agricultural wealth.

"Let me further illustrate the operation of the Act. Suppose I wanted to borrow \$1,000 on my farm, and it was appraised at \$2,000 or more, and my application was accepted. Suppose I wanted to have the loan run for 20 years. If I got it at five per cent, which I am sure will be the case, I could pay \$80.24 each year, and at the end of 20 years I would have paid in full all the principal and interest and have the mortgage discharged. I would have paid, in all, \$1,604.80. Suppose I tried to borrow that \$1,000 today on my \$2,000 farm, I could not get it for less than 10 per cent per annum. That means I would pay in 20 years, in interest alone, \$2,000 and would still have the principal to pay, \$1,000, making a total of all payments, \$3,000, in order to get the mortgage discharged. In that case I would pay \$1,395.20 more than I would pay under the Farm Loan System, just now provided. If the farm loan bonds sold for five per cent and I had to pay six per cent interest, my annual payments would be \$86.52, or \$43.26, semi-annually, in order to pay the debt in full in 20 years."

Mrs. L. Garner has opened a complete line of millinery that she will be pleased to show her friends and save them money. Edwards building, New York avenue. 7-tf

There is a new electric light being erected on Tenth street and Dakota avenue. It is all right. But it would not be a bad idea to have one on Twelfth street, in the same district, as it is a very dark spot and people have to carry a light when they go out. One extra light would do away with all that trouble.

REMOVAL NOTICE

The offices of the St. Cloud Development Company and the St. Cloud Public Utilities Company, have moved from Pennsylvania avenue and Tenth street to the New St. Cloud Hotel.

Comrade Kinser, of Jersey avenue and Fourteenth street, who was reported as being very ill, has been cured to his bed. He is a veteran and well liked by his neighbors.

The Epworth League business meeting, which was announced to be held at the M. E. church Friday night, has been postponed until the regular social meeting to be held October 27.

All members of the Wisconsin Badgers' Association are requested to be on hand next Thursday, October 19, at 9:30 a. m., to visit Wildwood Grove for a day's outing and picnic.

Mrs. H. M. Sloat, a resident of Leeds, N. Y., accompanied by her son, will shortly leave there for St. Cloud, making the trip by auto as far as possible. They will become permanent residents of our town.

Mr. and Mrs. Arnold Griswold, of Minnesota, arrived Friday of last week and have purchased the Shambow home on the corner of Carolina and Twelfth street, where they will make their future home.

Mrs. Fred Steyer, of Lakewood, Ohio, sister of Mrs. Anna Blach, and Mr. Steyer and daughter, Esther, who is a trained nurse, will visit St. Cloud this winter as the guests of Mrs. Blach.

An investment of only 25 cents in our splendid magazine club offer will give you and your family a monthly income of instruction and enjoyment for a whole year. Let us show you these magazines. 11

We are glad to see Mrs. Meatyard, one of our lady comrades, out again, and she will soon join us at our union.

Mr. Jack Fletcher was the guest of Miss Eda L. Epple, of Carolina avenue for several days. Mr. Fletcher is a resident of St. Augustine. He enjoyed his visit in St. Cloud very much and hopes to return again soon.

Film for all of the Family. **PALM THEATRE** PROGRAMME Come every night--You will be glad you did.

We show the latest series and serials.

"MYSTERIES OF MYRA," SATURDAYS AND WEDNESDAYS

THURSDAY:—"Their Mother," 2-act drama; Selig Tribune, all of the latest news, showing Mexican border scenes and many other places of interest. "Good Evening, Judge," comedy.

FRIDAY:—"The Girl From Frisco," two reels of the throbbing Golden West, of adventure, romance and thrills. First of the new 15-week series, "The Ired Business Man." First of the Myres Theba domestic comedy screams. "Pa's Overalls," one-act comedy.

SATURDAY:—First show at 5:30. "Mysteries of Myra," the serial with a punch, suspense, love and heart interest. "Dreamy Knights," one-act comedy, with Plump and Runt the run makers.

MONDAY:—Francis X. Bushman and Bryant Washburn, in the "Three Scratched Clue," "A Western Masquerade," a clever comedy. "Daisy the Demonstrator," comedy.

TUESDAY:—Hazards of Helen series, "Hurled Through a Drawbridge," in which it nearly cost Helen her life. "The Gold Ship," seafaring picture. Program capped off with a good comedy.

WEDNESDAY:—First show 5:30 p. m. "Mysteries of Myra," the serial dealing with the Occult forces. Bryant Washburn and Marguerite Clayton in a 3-reel drama. "Worth While." Five reels.

NEWS PICTURES, "THE SELIG TRIBUNE," EVERY THURSDAY
HAZARDS OF HELEN, EVERY TUESDAY
WESTERN SERIES, "THE GIRL FROM FRISCO," EVERY FRIDAY

Mr. Bert Baxter, who formerly made his home in St. Cloud, returned to the city yesterday afternoon, and will take charge of the barber shop in the Conn building, and make his home here in the future.

Go to Hatcher's store for your millinery, shirt waists, tailored suits and skirts, clocks and jewelry, and leave your watch work and jewelry for repairs, New York avenue, opposite St. Cloud Hotel. 5-tf

Mr. and Mrs. D. B. Hull have returned from a very pleasant trip to the west coast, stopping at Tampa, St. Petersburg, Pass-a-grille, Bradenton, Sarasota and several other places, enjoying the nice ocean breezes.

William Brent, brother of Mrs. Mercereau, of St. Cloud, died at his home in Toledo, Ohio, October 13rd. Mr. Brent was well known to many St. Cloud people, having visited the city two years ago.

When in need of "For Rent," "For Sale," "Posted," "For Hire," or cards of similar nature, it is well to bear in mind that all of these and many others can be had at the Tribune office for ten cents each.

The St. Cloud Board of Trade will hold its regular meeting next Monday evening. At this season it is the duty of every merchant in the city to attend these meetings and provide plans for building up the city.

Lieut. S. J. Entrikin, of Runnymede, returned home from attendance on the meeting of the county agricultural agents at Gainesville. Mr. Entrikin reports a most beneficial meeting of agriculturists and persons interested in the development of Florida.

The Tribune reaches more people than any other paper published in Osceola County.

Mrs. Agnes Cotton, who has been visiting several months at the home of Mr. and Mrs. Edd George, and at the home of Mr. H. Rummels, left on Monday for Lakeland to spend the winter.

The Loyal daughters will hold their monthly meeting tomorrow afternoon at 3 p. m., at the First Christian church. A good turn-out is expected, important business to be transacted. Refreshments will be served.

The date for the first number of the Lyceum course is drawing near. Most all of the seats have been reserved for the occasion, and the program provided is said to be far above those of previous years.

Dr. O. L. Buckmaster, Regular Physician and Surgeon; also Osteopath; Kirksville graduate of 1900; Latest improved X-ray, with equipment for all electrical treatments; chemical and microscopic examinations. Office in Conn Building. 3-4t

W. H. Merriweather, of Chuluota, Fla., is visiting friends in St. Cloud this week. Mr. Merriweather was mess mate with J. D. Alexander, who recently came to St. Cloud to locate, when the two comrades were doing service in the sixties.

Did you know that Bailey's Transfer carries express of reasonable bulkage and weight? The rates are from ten cents up. This means from Palace Drug Store at Kissimmee, to Marine's Drug Store at St. Cloud. Nothing taken for less than 10 cts. 5-tf

The Osceola County Fair Association has decided on February 14, 15, 16 and 17 as the dates of their first fair. Work starts next Monday on cleaning the lands where the race track and buildings will be located, and attractions are being secured to complete the entertainment of visitors. (Continued on page 8.)

CROP ESTIMATES MAN TO LECTURE AT CITRUS SEMINAR

Nat C. Murray, statistician and assistant chief of the United States Bureau of Crop Estimates, will lecture before the Citrus Seminar at the University of Florida, October 17. Mr. Murray will discuss the work which the Bureau is doing in Florida with special reference to citrus fruits. He will also compare production statistics and conditions in Florida with those of the United States and foreign countries.

The Bureau hopes to interpret its condition figures for citrus fruits quantitatively hereafter. It will be remembered that the production has been estimated in percentage rather than in quantities. An effort will be made to forecast citrus production in the number of boxes, just as the production of cotton, grains and other crops are estimated in bales, bushels, tons or other units.

Mr. Murray is the foremost authority of the world on crop statistics, acreages, production and other phases of crop estimates. His lecture will be of interest not only to citrus growers but to farmers generally.—Agricultural News Service.

WHAT CAN THE CITRUS SEMINAR DO FOR YOU?

The idea of a citrus seminar started back in 1910 and the first meeting was held that year. Some of the same growers who attended that first meeting went to the next and they have been attending every year since. They will attend the meeting this year. They have evidently found that their attendance pays. But there are some folks who have never been induced to go to the meeting and they cannot see their way clear to spend the money. They would like to know what they

could profit by attending the seminar this year.

First, there are a great many problems concerning citrus growing which they cannot solve. If there were no unsolved problems the condition of the crop in the state would be ideal. Everybody knows that it is subject to improvements. That is where the Seminar finds justification for its existence. Its purpose is to help growers to solve the problems that they cannot work out alone and to give them the latest information pertaining to the citrus industry. That aim is toward a better citrus crop, bright fruit and clean trees. The return of men who have attended the previous meetings is ample testimony that the efforts of the Seminar are succeeding.

Is there a marketing problem that is troubling you? Have you obtained the results you desired from your fertilizer experiments? Have you been able to cope successfully with every disastrous fungus disease or insect pest? Have you had any trouble with spraying machinery or spraying materials? Do you produce your share of bright, clean fruit? Are you making as much money out of your grove as you would like? In short, are you wise enough to cope with all the situations that arise during the year? Then prepare to attend the Seminar at the University of Florida, October 17th to 20th.

The Seminar is not a panacea for all citrus ills. It does not pretend to solve all problems, but it assembles the best authorities available on citrus problems and offers them to growers, not as a complete solution of those problems, but as an aid toward the ideal.—Agricultural News Service.

HAPPENINGS OF INTEREST AT UNIVERSITY OF FLORIDA

Home Coming Arranged For Alabama Game On the 21st Day of October

Every alumnus of any institution expects some day to return to his alma mater. Universities and colleges recognize this desire and usually designate one day in each year as homecoming day. Homecoming day at the University of Florida this year will be October 21, the day of the Alabama game. This will be one of the big games of the season and arrangements are being made to welcome the old grads. Florida has a team this year which promises the best for several years. Coach C. J. McCoy has a world of raw material out. Most of the candidates are big, husky, willing fellows and needs only time to lick them into a formidable fighting machine. His work with the green material has been greatly lessened by the veterans who are on the team.

Florida has one of the stiffest schedules in the South this year. The Gators will meet Georgia at Athens on October 14; Alabama at Gainesville, October 21; Tennessee at Tampa, on October 28; Mercer at Gainesville on November 4; Indiana at Bloomington, November 18. The Alabama and Florida teams are pretty evenly matched, judging from last year's dope, and alumni are assured a good game.

In addition to the football game several other entertainments will be given. The program has not been completed, but the following events have been definitely settled:

Coach McCoy has promised a rally and bonfire on Fleming Field Friday night. This will be the kind that the old grads used to have during their student days and they will have an opportunity to let out their true old Florida spirit. A parade will be given Saturday morning and all the fraternities will hold open house Friday and Saturday evenings.

The Alligator will issue a homecoming edition October 30. The Alumni edition will be issued October 31. An effort is being made to obtain a short biography of every alumnus from the time he left school to the present. This, together with his present occupation, will be published in the class roll. The editors of the Alligator are promising two excellent editions for the alumni.

It will be possible for visitors to use the rates granted for the Citrus Seminar which will be held at the University during the four days preceding the game. The rate will be three cents a mile plus twenty-five cents for the round trip to Gainesville. Tickets will be on sale for the Seminar at all points in Florida October 16, 17, 18, 19 and 20, with a final return limit of October 22. If a special rates are not obtained for the game it will be possible for Alumni to use seminar rates since tickets will be sold up to within a day of the game and will be valid for return Sunday.

An effort will be made to reach every alumnus of the University. There are more than 400 in the state and it will be possible for many of these to attend. In addition a large number are expected from neighboring states. This will be an excellent opportunity for old graduates to renew acquaintances with the university in its recent progress and to meet old friends or student days. A great many improvements have been made since most of the alumni left and the University has outgrown most of their conceptions of it. Few of the old men who were in school together several years ago will ever meet except at homecoming time.

Scientific Journal Honors Dr. Davis.
 Dr. H. S. Davis, professor of zoology and bacteriology in the College of Arts and Sciences, received recently a separate of the Journal of Morphology containing an article written by him in the June issue of that publication. The article is on a heretofore undescribed species of parasite of certain marine fishes. Dr. Davis made the discovery of this species while he was making an extended study of the Myxosporidian parasites of the marine fishes of Beaufort, N. C. Owing to the many points of exceptional interest which this species exhibited, Dr. Davis made an extended investigation of its structure and development.

Most of the work was done at Beaufort while Dr. Davis was connected with the U. S. Fish Commission, New York Ave.

with the Bureau of Fisheries Laboratory at that place during June, July and August, 1911 and 1912. The results of his findings were published in the journal previously mentioned, Volume 27, Number 2, in June of this year, by permission of the Commissioner of Fisheries.

The Journal of Morphology is recognized by scientists as one of the best and most authoritative publications of its kind and its recognition of Dr. Davis' work is a distinct compliment to his ability.

Engineering Jobs Go Begging.
 The College of Engineering has been asked recently to fill ten or eleven jobs with its graduates. According to J. R. Benton, dean of the college, all graduates have positions and the jobs had to go begging for men to take them. The demand for engineers has shown a great increase during the last few months and the effect of it is reflected to a certain extent by the enrollment in the college this year.

Dean Benton says that the increase in enrollment for the first two weeks since the University opened is ten per cent greater than it was for the whole of last year. The freshman class is forty per cent greater than any previous freshman class.

Demonstration Agents Meet at the University.
 The county demonstration agents and twelve new home demonstration agents met at the University this week. Miss Agnes E. Harris, state agent for the home demonstration work, had her newly appointed agents meet at this time so that they could receive instruction in their work and get in touch with the work which the men are doing. They held canning, sewing, preserving, bread-making and tomato culture demonstrations. They attended some of the county agents' sessions during the principal lectures. Some of the speakers of the agents' meetings were drafted for the women's sessions.

Nat T. Frame, state agent for West Virginia, gave a series of lectures during the week on organization. Mr. Frame has had a great deal of experience in demonstration work and he is recognized as one of the best rural organizers in the country. His lectures illustrated a great many problems common to all states and the agents received much valuable information from his discussions.

Other lectures by workers of the United States Department of Agriculture, the Experiment Station, Extension Division and by the agents themselves, helped to make the meeting the most successful that has ever been held in the state.

Extension Workers to Have a Busy Fall.
 Extension workers of the University will have a busy fall this year. Every day from October to Christmas has been taken, according to C. K. McQuarrie, state agent for the Extension Division. There has never been such a demand for lecturers. Fairs and farmers' meetings will occupy a great deal of the time. Extension workers are in great demand as speakers and judges at the fairs and some of them will have to preside at the club contests in every county where a club is organized.

Mr. McQuarrie says that there is a greater interest among farmers for extension lecturers. In some counties where a meeting attracted only fifteen or twenty a few years ago, a crowd of 200 or more is not uncommon now.

Seniors Hold Mixer.
 The Seniors of all divisions of the University held a "mixer" Saturday night for the faculty and new men. This reception was given so that the freshmen and old men could become acquainted. Several faculty members and students spoke, among whom were Dr. A. A. Murpree, president; Dean H. R. Trusler, and Dr. W. L. Summers, of the College of Law; J. R. Farrior, captain of the "Gators," and Coach C. J. McCoy. The meeting was held in the practice court room of the Law Building, and apples and fruit punch were served in the Law Library.

Agricultural Club Entertains.
 The Agricultural Club of the College of Agriculture held an open meeting last night for the county agents and home demonstration agents who met at the University this week. The principal speaker of the evening was Dr. N. L. Sims, professor of sociology in the University, who talked on the possibility for rural social leadership among college men. L. J. Stadler made short talks. Ice cream and cake were served at the close of the meeting.

Ice cream and cake were served at the close of the meeting.

Personal Mention.
 B. F. Floyd, plant physiologist to the Experiment Station, visited Pinellas and Hillsboro counties to take notes on some citrus experiments he is conducting in co-operation with the growers in those counties.

Mrs. J. E. Turlington, wife of Dr. Turlington, professor of agronomy in the College of Agriculture, arrived from North Carolina last week with their three children. Dr. Turlington and his family are keeping house at the corner of Orange and Arredonda streets.

J. G. Kellum, secretary to the board of control, has been auditing the books of the University this week.

D. R. McQuarrie, formerly demonstration agent for Madison county, with his family visited his father, C. K. McQuarrie, last week. Mr. McQuarrie was on his way to Sarasota, where he has become manager for the Mrs. Potter Palmer ranches.

Miss Harriette B. Layton, district agent for the home demonstration work, is preparing a bulletin on farm butter making. She was in Gainesville during the agents' meeting and

obtained some material for the bulletin.

HOME COMING DAY AT THE UNIVERSITY OF FLORIDA

The date of the Alabama-Florida football game, October 21st, has been designated "Home Coming Day" at the University of Florida. This will be a chance to revery bid grad to make a visit to his Alma Mater and to renew the acquaintances of his student days. Furthermore, it will be an opportunity to note the progress of the University.

A royal welcome is planned for the Alumni. In addition to the foot ball game, which is one of the hardest the Gators will have this year, other entertainments are planned. Of course the program is not complete, but the following events have been scheduled. A real old Florida, blood-thirsty bonfire and rally will be held on Fleming Field on Friday night. This will be an opener and pep hatcher for the next day. A parade will open the ceremonies Saturday morning, when everything in the University community that is not tied down will be on foot or on wheels.

HOME COMING DAY AT THE UNIVERSITY OF FLORIDA

(Continued from page 6) The game will be staged during the afternoon. The teams are pretty evenly matched and the old men are promised a real exhibition of Gator grit.

VARIETY OF VEGETABLES CAN BE GROWN IN FALL

A wide variety of vegetables can be grown for home consumption during the fall gardening season. Many of these vegetables are not injured by frost and, hence, can be planted during the entire fall.

Onion sets for early table use can be planted up to Christmas, and onion-seeds sown in beds during October or November should produce plants for the field by early March.

Peas and beans may be planted within 35 to 45 days of frost. Radishes, beets, turnips, lettuce and many of the hardier vegetables will add considerable variety to the garden.

ARE YOU A TIN CAN GARDENER?

It is fall gardening season again. Do you intend to garden in the soil or in a tin can. The man who plants a home garden is assured that his vegetables will be fresh and wholesome, but the man who buys canned

...that canned goods are pure and of good quality they are expensive. Why not pay yourself the profits which the manufacturers, transportation companies and various middle men attach to them?

Every man owes his own and his family's future physical welfare; a change from the diet of grits and grease. The home garden will vary this diet and pay a big dividend in health and cash for years to come.

C. K. McQuarrie, state agent for the University of Florida Extension Division, urges every farmer and every city man who can command a small plot of ground to plant a garden.

BURNING TRASH FROM FIELDS MAKES POOR LAND

The easiest way to get rid of trash and crop remains is by fire. This is also the easiest means of destroying the fertility of the land. Florida soils need the organic matter which turns rubbish into soil.

S. S. Walker, associate chemist to the University of Florida Experiment Station, cites another important office of the organic matter. This material furnishes food upon which the beneficial soil organisms live.

LEGAL ADVERTISEMENTS

Notice of Election In compliance with Chapter 6831, Laws of Florida, 1915, notice is hereby given that an election will be held at St. Cloud, in Special Tax School District No. 1, Osceola County, Florida, on Tuesday, November 7th, A. D. 1916, to determine whether compulsory school attendance shall prevail in said district and to decide whether the following compulsory school attendance provisions shall be enforced in said Special Tax School District:
